I am an IT professional specializing in software development, system architecture, and IT consulting, with expertise in Java, Python, PHP, TypeScript, and SQL. With a strong foundation in full-stack development, database management, and cybersecurity, I am eager to apply my technical skills to innovative projects and contribute to the success of forward-thinking teams. My ability to analyze complex challenges, develop scalable solutions, and optimize system performance makes me a valuable asset in various IT roles, including software engineering, IT security, and backend development.

During my studies at Delaware Technical Community College, I have maintained a 4.0 GPA while refining my abilities in full-stack development, database management, and network security. Throughout my academic and professional journey, I have worked on developing scalable web applications, managing cloud-based infrastructure, and implementing security best practices. I have developed a deep understanding of enterprise system implementation, cloud computing (Azure, cPanel, NameHero), and cybersecurity best practices (SELinux, system hardening, and encryption). I thrive in problem-solving environments where I can apply my skills to create efficient, secure, and user-friendly systems.

Beyond technical knowledge, I have gained valuable leadership and teamwork experience, managing projects, mentoring peers, and collaborating with cross-functional teams. Whether troubleshooting technical issues, optimizing system performance, or developing innovative solutions, I am committed to delivering high-quality results.

I am particularly passionate about leveraging technology to solve real-world problems and improve business operations. My interests span game development, cybersecurity, enterprise solutions, and backend system optimization. My passion for technology-driven solutions drives me to continually improve and stay up-to-date with the latest advancements in software development, AI, and cloud technologies to create impactful solutions.

I am always open to exploring new opportunities where I can apply my knowledge and contribute to innovative IT projects. Please feel free to connect with me to discuss potential collaborations or career opportunities. Thank you for your time and consideration.

Sincerely,  
Kyle Stranick
